Who we are

SISTech is a not-for-profit research organisation providing innovative solutions for sustainable development in the natural and built environments. We are committed to developing methods and projects that maintain the principles of sustainability, further community welfare and produce robust, unbiased results.

Jointly owned by Heriot-Watt University and MWH UK, SISTech combines academic networks and engineering expertise with the localised service of a small dedicated team.

SERVICE OFFERINGS

- Evidence review
- Environmental assessment
- Monitoring and evaluation
- Strategy and policy development
- Knowledge exchange and stakeholder management
- Resource management

Why choose SISTech

SISTech delivers high quality, enduring solutions for sustainable development through innovative research, policy and technical advice and by practical application. We work closely with our clients and partners to define their needs, establish project objectives and ensure that project outcomes are met. Our staff are practical, creative and professional. We work with a wide range of professionals in the sustainability field, including experts from academia and industry.

Examples of our work

- Climate Change Support, Falkirk Council 2009
- Carbon Strategy, Forth Ports 2009
- Benchmarking Scotland's Sustainable Tourism, SNH 2009
- Embodied Carbon of Stone, Historic Scotland 2009
- Strategic Environmental Assessment of the River Basin Management Plan, Scottish Government 2008
- Future of Flood Risk Management Consultation, Scottish Government 2008
- Sustainable Development Framework for the Gogar Burn, 2007
